

Introducing
atsec information security

Who are we?

atsec is an independent privately owned company.

Focusing only on information security

our services include:

- Accredited laboratories for testing commercial off the shelf (COTS) information technology.
- Consulting & support services for IT security

Organization

Today, atsec has about 60 people in 5 locations

- USA: Austin - Texas
- Europe: Munich - Germany, Stockholm - Sweden
- Asia: China: Beijing and Shanghai

Foundations

- The company was founded in January 2000
- Founders were confident that a company focused **solely** on providing information security services would be successful.
- Since then atsec has grown steadily and organically. We are lucky to be financially independent. We have no venture capital, no credit debt or loans. Thanks to our customers, we truly are independent!

atsec's business principles

■ **We know the business**

- atsec knows the worldwide information security consulting business very well. With a multinational staff, it is only natural that we feel comfortable operating internationally. We are a company with global reach.

■ **We act with integrity**

- Information security consulting and evaluation is a high-integrity business, and very much a matter of trust. All atsec employees are committed to sustaining the highest degree of integrity in our client relationships. We are devoted to delivering the highest quality in a timely manner.

■ **We stay focused**

- atsec consultants are information security consultants. As such atsec focuses solely on information security consulting. We do not consult in any other areas, and we do not sell hardware, software, or any other ware.

■ **We are independent**

- We are not affiliated with any hardware or software vendor, and we never will be. Our credibility as consultants hinges on that independence. Our customers can rely on us to be objective. We have no interest in selling anything other than our security expertise.

Versatility

- Our “basket of security experts” allows us to offer true expert consultancy and not just production line service.
- We offer customized services and combine them in ways that help customers gain the assurance that they need. For example:
- We open new offices and develop new services, as needed because that is what our customers need.

Expertise

atsec consultants have longstanding expertise in IT security consulting. We offer services in many technologies including:

- Source code analysis
- Security architecture
- Virtualization
- Physical security
- Standards Development
- Embedded systems & hardware
- Mainframes
- Operating Systems
- Databases
- Cryptography

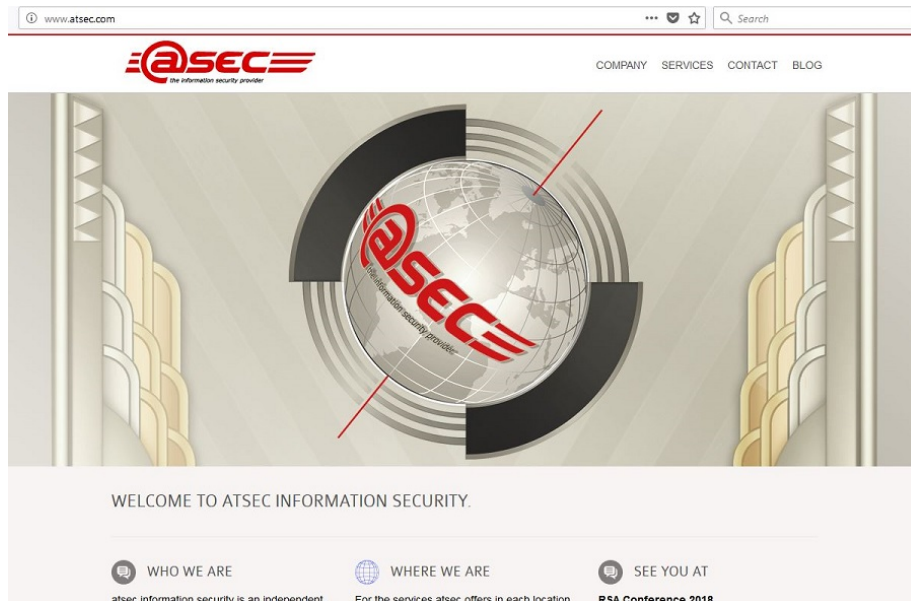

We combine these core skills to create the services customers need

Why are we different?

- We are industry leaders with many renowned experts of IT security in our “basket”.
- We are trusted by our customers. They stay with atsec for many years.
- We are independent of external influences, from finance to “partnerships” with product vendors.
- We take time to understand your unique problems and use that knowledge to innovate and design solutions that meet your needs.
- Quality: We are ISO 9001 and ISO/IEC 27001 certified ourselves.
- We understand that being on time can make all the difference.
